

Quality, Safety and Environment Policy

Maltexco S.A. is a leading company in the production of malted barley and products derived from cereals, committed to meet the demand of the brewing and food industries. Our Integrated Management System is based on Quality, Safety and Environment principles, and its proposed objectives are consistent with the general principles of our organization. These objectives are achieved with the commitment of all the members of Maltexco.

Through the analysis of new opportunities, alongside the development and improvement of our own operations, we strive to continuously improve our processes, environmental performance and the quality and safety of our products. On the other hand, Maltexco is committed to complying with legal and regulatory requirements, as well as those mutually agreed upon with our clients.

At Maltexco, we are committed to keeping sustainable actions on our operations, where the well-being of both our workers and the surrounding communities complements the development of our own industry. For this reason, we understand that our present and future must consider efficient and responsible use of natural resources, and the commitment to care for the environment, including pollution prevention. All of these are accomplished through a deep understanding of our operations, which allows us to analyze and implement actions that can lead us through such efficiency and to reduce environmental impact. These actions also consider the commitment of our agricultural suppliers, so that through mutual collaboration and the encouragement of best practices, we may work together toward a more sustainable agriculture.

We provide the required resources, including training and additional education for our employees. At Maltexco we have external and internal communication strategies that allow us to respond promptly to any change that may affect our environmental performance, or the quality and safety characteristics of our products.

This policy is known and applied at every level of our organization and it is available for all relevant stakeholders, providing the basis on which our integrated management system is organized.

Álvaro Cruzat O.
General Manager
